

HOSSEIN FERDOSI

Full-stack Developer

- ✔ Available for work
- ✔ Full-time Job
- ✔ Focused on React and Next.js development

ABOUT ME

I am a full-stack developer with experience building modern websites on both the server and client sides. I am always curious to learn new and challenging technologies, especially plugins and libraries that improve performance and project quality. I enjoy expanding my skills and knowledge every day and using the latest tools and approaches. I place great importance on code quality and optimization and always strive to find the best solutions to complex problems. My goal is to create websites that not only meet users, needs but also provide a delightful and satisfying user experience.

JOB EXPERIENCE

Although I haven't had formal work experience yet, I have completed several personal projects that strengthened my practical web development skills. I have worked with React and Next.js in these projects, which enhanced my problem-solving abilities, familiarized me with modern development practices, and prepared me for professional work environments.

PERSONAL PROJECTS

Real-time Chat Application with Socket.io

A real-time chat application built with Next.js for frontend, authentication, and database, and a separate Node.js + Express server for handling Socket.io connections. Supports instant messaging between users.

- Real-time messaging between users using Socket.io
- Built with Next.js for frontend, authentication, and database
- Better Auth: Email & Password + OAuth
- Prisma + MySQL: Database ORM for managing users, messages, and conversations
- Node.js + Express server for handling Socket.io connections
- Theming: Supports Light and Dark modes using Shadcn/ui, automatically or manually switchable - Lightweight, fast, and optimized for demo purposes
